## **DETAILED ACTION**

### ***Continued Examination Under 37 CFR 1.114***

1. A request for continued examination under 37 CFR 1.114, including the fee set forth in 37 CFR 1.17(e), was filed in this application after final rejection. Since this application is eligible for continued examination under 37 CFR 1.114, and the fee set forth in 37 CFR 1.17(e) has been timely paid, the finality of the previous Office action has been withdrawn pursuant to 37 CFR 1.114. Applicant's submission filed on March 27, 2006 has been entered.

### ***Election/Restrictions***

2. Claims 1 and 9 are generic and allowable. Accordingly, the restriction requirement as to the encompassed species is hereby withdrawn and claims 6, 7, 14, and 15, directed to the species of figure 2a is no longer withdrawn from consideration since all of the claims to this species depend from or otherwise include each of the limitations of an allowed generic claim.

In view of the above noted withdrawal of the restriction requirement as to the linked species, applicant(s) are advised that if any claim(s) depending from or including all the limitations of the allowable generic linking claim(s) be presented in a continuation or divisional application, such claims may be subject to provisional statutory and/or nonstatutory double patenting rejections over the claims of the instant application. Once a restriction requirement is withdrawn, the provisions of 35 U.S.C. 121 are no longer applicable. See *In re Ziegler*, 44 F.2d 1211, 1215, 170 USPQ 129, 131-32 (CCPA 1971). See also MPEP § 804.01.

*Allowable Subject Matter*

3. Claims 1-19 are allowed.
4. The following is an examiner's statement of reasons for allowance:

No reference nor combination of references was found which teaches a transfer case having first and second transfer chains having different chain ratios operatively connectable between an input member and front and rear axles, wherein the transfer case includes first and second input clutches connected with an input member and a four wheel drive clutch operatively connected between one of the transfer chains and one of the axles, as required by claims 1, 9, and 18.

The examiner agrees that since the "clutch" 62 of Baxter, Jr. is actually a brake used to provide a reaction member for a planetary gear set, it cannot fairly be considered to be an input clutch by any interpretation of the term.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

*Conclusion*

5. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure.

Art Unit: 3681

U. S. Patent 570,015 (Hall), U. S. Patent 575,725 (Meister), and U. S. Patent 5,492,349 (Ferez) each disclose a transmission including first and second input clutches connected with an input member and first and second transfer chains having different chain ratios.

U. S. Patent Application Publication 2005/0215377 (Haka) September 29, 2005 - discloses a transfer case for a vehicle including two input clutches, two transfer chains having different chain ratios, and a four wheel drive clutch.
